AASHINI SINGH

Computer Science & Engineering Student | Frontend Developer | Problem Solver

Greater Noida, Uttar Pradesh | GitHub: github.com/aashini-singh | LinkedIn: linkedin.com/in/aashini-singh

PROFILE

Motivated B.Tech Computer Science student with hands-on experience in frontend development, JavaScript, C/C++ programming, Data Structures & Algorithms, Python, Git/GitHub and project-based software development. Currently gaining professional experience through a Frontend Development internship at Codomax Digital Solutions. Passionate about building responsive, interactive and user-focused applications while strengthening problem-solving and software engineering fundamentals.

TECHNICAL SKILLS

Languages	C, C++, Python, JavaScript, HTML5, CSS3
Web Development	Responsive Design, Flexbox, CSS Grid, DOM Manipulation, Form Validation, LocalStorage
DSA	Searching, Sorting, Linked Lists, Stacks, Queues, Hashing, Trees, Graph Algorithms
Tools	Git, GitHub, VS Code, MongoDB Compass
Frameworks	Flask, React, Recharts
AI / Algorithms	A*, Greedy Search, Minimax, Alpha-Beta Pruning, Constraint Satisfaction Problems

EXPERIENCE

Frontend Development Intern — Codomax Digital Solutions | 2026

- Building and enhancing a personal portfolio through structured internship modules covering HTML, CSS, responsive design and JavaScript.
- Implemented responsive layouts using Flexbox and CSS Grid, mobile navigation, Dark/Light mode, scroll animations and client-side contact-form validation.
- Used Git/GitHub to manage project versions, publish work and document module-wise development progress.

SELECTED PROJECTS

Smart Blood Bank Management System

Designed a blood-bank management solution focused on donor registration, blood availability and emergency matching workflows.
Tech: C/C++ • DSA • Git/GitHub

Smart Public Utility Complaint Management System

Built a menu-driven complaint system using file handling to organize, store and track public utility grievances.
Tech: C • DSA • File Handling

CoffeePeelo — Interactive Coffee Website

Built a responsive website with product cards, interactive UI and a JavaScript shopping-cart workflow using LocalStorage.
Tech: HTML • CSS • JavaScript • LocalStorage

Smart Hospital Management System

Created a Python console application for hospital records with structured JSON persistence and reusable program logic.
Tech: Python • JSON • Data Persistence

AI/NLP Engine for SIF Precursors

Developed an AI/NLP project concept for identifying Serious Injury & Fatality precursors in unsafe-act, unsafe-condition and near-miss reports, with risk categorization and dashboard-oriented insights.
Tech: AI/NLP • React • Recharts • Data Analysis

EDUCATION

B.Tech — Computer Science & Engineering | NIET, Greater Noida | 2024 – Present

Focus areas: Data Structures & Algorithms, Web Development, Programming, Artificial Intelligence concepts and software project development.

ADDITIONAL STRENGTHS

- Project-oriented learner with a strong preference for applying concepts through working applications.
- Comfortable debugging development issues, learning new tools and improving projects iteratively.
- Experience with hackathon/ideation projects, technical presentations and structured project documentation.
- Career interests: frontend development, backend development, DSA, AI-assisted applications and practical software engineering.
